## **CONGRATULATIONS !**

**Congratulations for choosing a PUR LINE Humidifier.** This Owner's Manual includes important instructions about using and maintaining your humidifier.

**WARNING:** DO NOT DEPEND ON THE ON/OFF BUTTON AS THE SOLE MEAN OF DISCONNECTING POWER WHEN SERVICING OR MOVING THE HUMIDIFIER ALWAYS UNPLUG THE POWER CORD AFTER SWITCHING THE UNIT OFF.

### **PLEASE READ AND RETAIN FOR FUTURE REFERENCE.**

Read carefully before attempting to install, operate or maintain the "ionizer-humidifier". When using any electrical appliance, basic safety precautions should be followed.

#### 1. Prior to using humidifier :

- Check the power supply cord for signs of damage (do not use if there are signs of frayed or exposed wires)
- Do not use an extension cord.
- Do not operate humidifier without water in the tank

#### 2. Where to place your humidifier :

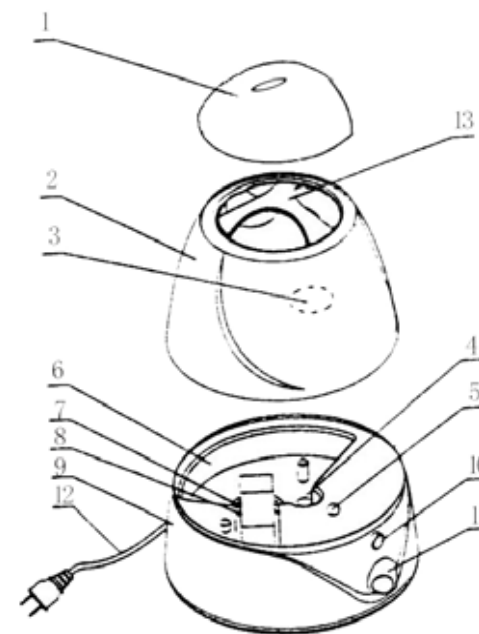

- Place humidifier on a firm, flat, level, water resistant surface.
- Place humidifier away from heat sources (stoves, radiators and heaters can damage the unit.
- Place humidifier in an area where it is not accessible to children and with the power cord positioned to avoid being pulled on, or tripped over.
- The unit must be placed away from any surface that could be deteriorated by the damp airflow ( Ceiling, Wall, wall paintings etc..)

#### 3. Safety precautions:

- This product is equipped with a polarized 230 V plug.
- Always unplug ( with dry hands) and empty humidifier before servicing or cleaning. Never turn on the power head while it is removed from the base.
- Avoid handling the humidifier while it is operating. Never tilt it.
- When not in use, switch off and unplug the humidifier. Empty, clean and dry thoroughly the water tank, fold the power supply cord.
- Pack the unit in its original carton and store in a cool, dry place.

### **Schematic illustration:**

- 5) Indicator light
- 6) Water flume
- 7) Heat diffuser
- 8) Transducer
- 9) Base
- 10) Power and ioniser switch
- 11) Rotary switch for moisture adjustment
- 12) Power supply cord
- 13) Handlebar

### **Description :**

- Elegant and attractive unit
- Easy to clean because of its streamline design.
- Ultrasonic Humidification with high frequency vibratory.
- Purifies air with build in negative ion device emitted in the central column. The ion emission is spread in the air with the cold steam fog.
- Silent because of its "shaded pole" motor and advanced design air flow system.
- Safe to use, shutt off automatically when water tank is empty.
- Longer life span because of its China and titanium alloy construction.
- Plastics made with "Nanometer" technology for anti-fungus, anti-bacteria benefits.

## Technical Parameters :

Model : HUMY3

Moisture capacity : > 300 ml/h

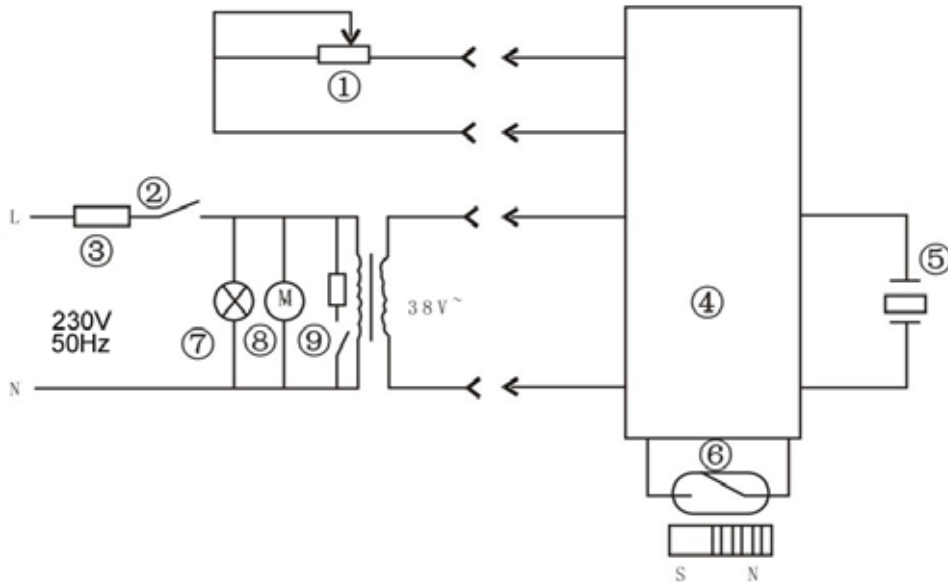

Water tank volume : 3 L

Rated voltage : 230 V

Rated frequency : 50 Hz

Rated power : 45 W

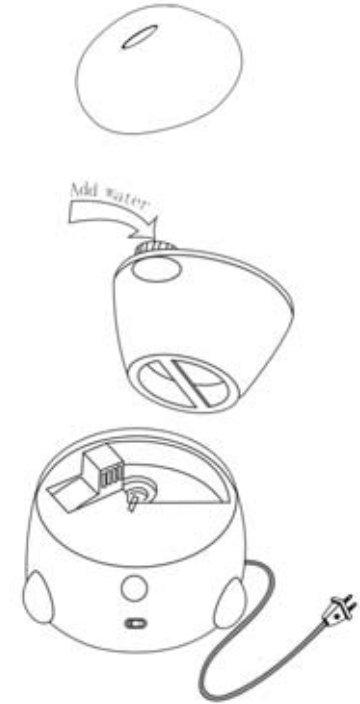

## Electric Diagram :

1. Regulation-resistance for mist adjustment
2. Power switch for negative ionizer.
3. Fuse
4. Master control panel
5. Transducer
6. Water-level sensor
7. Indicator light
8. Air blower
9. Negative ion producer
10. Rotary switch

## Operating instruction:

- 1) Move the dome cover from water tank.
- 2) Take out the water tank and put it upside down.
- 3) Unscrew the nut cap, fill the water tank with cold and clean water (do not use hot water).Screw back the nut cap(tightly), put back carefully the water tank on the base. Make sure it's in the correct position.
- 4) Place the machine on a hard, level, flat, water-resistant surface.
- 5) Place the dome cover straight on the water tank.
- 6) When the power switch is on, the units starts to function.
- 7) Use the lower switch to adjust the mist-spray.
- 8) To keep the water tank clean use soft water.

## Cleaning instructions:

### Do not immerse unit in water.

You must use soft water to avoid mineral deposits. However, regular cleaning of the water tank is recommended:

Unplug the humidifier

- i) Empty water tank you can use mild soap and a soft brush or cloth to clean it.
- ii) In case of calcium accumulation, (if hard water has been used) clean with a solution of water and vinegar. (Remember :it is recommended to use soft water)
- iii) Rinse with clean tap water.
- iv) Wipe dry with soft cloth.

## STORAGE :

- (1) Clean and dry the water tank thoroughly (as instructed in the section:" cleaning instructions").

- (2) Be sure all components are dry. Do not leave any water in the reservoir.
- (3) Pack the humidifier in its original carton and store in a cool, dry place.

**WARNING** : Any repair must be done by a qualified technician .

**REMEMBER** : **do not** use strong detergents, gasoline, alcohol and other organic solution to wipe the humidifier or the color will fade.

**WARRANTY**: 1 year to first buyer

To insure of rights to warranty privileges, please insure to include with claim your proof of purchase showing purchase date.
